

Executive Director's Report – March 8, 2022

FROM – Ted Lewis

RE: Monthly Report - February / March 2022

- 1. Amended Budget** – Following last month's meeting we submitted the budget amendment (to cover the cost of the damaged main in route 35) and the change was approved by the DCA on February 10
- 2. Route 35 Damaged Main** – The work on the main has been completed and invoices have just arrived as this is being written – they are being reviewed by T&M. It appears the total cost for work will be in the range of \$180,000 (and that does not include the resurfacing work we will have to do after the excavation settles for 90 days). Herb televised the other mains in the area and feels they need to be lined to try to avoid another problem like this. He sent the recording to T&M for their review and recommendations.
- 3. Emergency Repairs** – In addition to the Route 35 issue, we had a number of other unanticipated repairs including – 27 Maxwell (\$17,500 to replace a damaged lateral), Pine Brook Road (\$14,194 to repair a forced main damaged by FMERA's contractor) and 66 Oak Lane (\$15,000 to repair a broken clean out).
- 4. FMERA** – T&M is working on survey and topography data for the project pending information on what type of development might be expected on the site; soil borings are currently underway. T&M contacted me to inquire as to our preferences with regard to the design of the pump station that will be required – I referred them to Herb
- 5. Old Orchard Pump Station** –T&M is reviewing shop drawings submitted by the contractor- there is no schedule for component delivery so we do not know when the work may be done. I received a lien form from one of the subcontractors which I referred to Mr. Bonello.
- 6. Office System Upgrade** – Gloria has a session scheduled with Edmunds (3/10 &11) which will complete our upgrade of the office computer system.
- 7. AEA Reports** – We were finally able to update the Board members contact information so all should be getting AEA reports and information.
- 8. Sun Eagles Area** – We still have not received the connection fees due on the project.
- 9. Borough Take Over** – I have not heard anything new regarding the Borough's plans.
